

IN THE ABSTRACT:

Please insert the following abstract:

The invention relates to a golf ball dispenser having an upper container which houses the golf balls and a flange which receives the balls from the container and which supplies the balls individually to a dispensing arm. The dispensing arm, which is disposed such that it is essentially vertical in the rest position, includes structure for pivoting around a horizontal axis when a golf ball is being dispensed, the pivot structure is disposed in the upper part thereof close to the above-mentioned flange.
